Saturday issue only, per year.....\$2.00

SUBSCRIBERS' NOTICE.

The majority of subscribers to the Standard desire that it shall not be discontinued when their subscriptions expire. This is the reason why, if you want the Standard discontinued to your address when the period for which payment is made has expired, you are asked to notify the publisher by card, letter or personally, or notify your mail carrier. It is as easy to stop the Standard as it is to start it, and the paper will not be sent longer than you pay for it. If it is not to be discontinued, you are asked to notify the publisher. One subscriber who gets angry if we keep on sending another gets angry if we keep on sending the paper on him. Please notify us if you want the Standard stopped.

REV. J. D. NUTTING AND THE EXAMINER.

The columns of the Standard always are open to a signed statement couched in respectful language, and in the case of Rev. J. D. Nutting, whose article appeared last evening, no exception to the rule was made, notwithstanding that the Examiner attempts to make capital out of the occurrence. The Examiner's cunning in this particular is not so cleverly enacted that the average person with ordinary discernment cannot discover the lickspittle tactics of the morning paper.

The Standard has been a defender of the people of Utah when to do so required moral courage to reinforce honest convictions, and The Standard will continue to uphold the good name of this state long after the present editor of the Examiner, like other birds of passage, has departed to become another Nutting, where anti-Mormon utterances are popular.

The Standard, at least on two occasions in the past has taken Rev. J. D. Nutting to task for his assaults on the people of Utah. The reverend gentleman has been a regular visitor to Utah, over a long period of years, and his attacks and the counter-attacks had grown somewhat stale with age, and we had hoped the end of the controversy had been reached. All the ground had been threshed over many times, and this time the wagon missionary might have come and gone, comparatively unnoticed, if undue importance had not been attached to his visit.

This constant bickering accom-

plishes nothing and only tends to fan the flames of religious prejudice.

Rev. Nutting, in our opinion, was pretty well disposed of years ago and should have been dropped. No man to the controversy profits more than Rev. Nutting, as publicity and contentment bring him large audiences and some measure of prominence which can be converted into revenue, either here or in the east.

SUBMARINES OF GREAT RADIUS.

Even before Thomas A. Edison has applied his discoveries to our submarines, the undersea craft of the United States are to outclass any similar vessels in the European war. The G-3, under going final test at the plant of the Lake Torpedo Boat company of Bridgeport, Conn., has proved to have a cruising radius of 5500 miles at a speed of eleven knots an hour, which is sufficient to allow the boat to cross the ocean and return without replenishing its fuel supply.

The submarine is to be the warship of the future, in fact it may be said to be the most effective war craft of today.

Larger "divers" are being constructed and it seems possible that the submarine will grow in size and capacity until the mightiest of battleships will become submersibles.

So far no method of successfully meeting a submarine offensive has been worked out. If Mr. Edison can accomplish that, then the United States will be both offensively and defensively ready to defy the navies of the world.

SHOPS WORKING MANY MEN.

Seven hundred men are working in the local Southern Pacific shops. This force is as large as the Ogden shops has had and is proof that the railroad business is improving.

The Standard is informed that passenger travel to the world's fair is somewhat disappointing, but freight business is rapidly increasing, indicating a restoration of normal industrial conditions throughout the country.

When the railroads are kept busy, Ogden feels a toning up in all lines of business, because a large percentage of the population is dependent on the railroads for the revenue that goes to vitalize trade.

HIGH PRICES FOR THE WEST.

The west should be bubbling over with prosperity. There is not one article of any kind produced in this region that is not commanding unprecedented prices.

Copper is 20 cents per pound; lead

is 5.50 cents per pound; spelter is 20 cents a pound; wheat is far above a dollar a bushel; cattle are out of sight; wool is close to 30 cents a pound; lambs are selling at \$4.50.

Beet sugar is at a good figure, with prospects of remaining at a profitable quotation for years to come.

This fall, when the harvests are converted into money, the west should have more money than at any time in its history and every line of industry should be going at top pressure.

SOLDIER BOYS IN THE HARVEST FIELD.

The Canadian government proposes trying a novel experiment in the art of war, that of setting its recruits to work gathering home the wheat harvest, now ripening in the fields of the northwest. This is the most sensible proposal heard recently in connection with the war. No better use could possibly be made of soldiers than to give them such employment as will be of service to the world.

The ordinary service of the soldier is to destroy, his occupation being such that death and desolation follow in his path, but here he may be set at the works of peace and his labors be crowned with a benison of plenty.

It may be a little odd to think of Bucephalus, or even Rosinante, hitched to a self-binder, but it wouldn't hurt him any, save perhaps in his pride, and so it will not hurt the soldier boys to do a little stunt in the harvest fields. In fact, they will be all the better for it, just as good soldiers as before, and better farmers than ever. And at this moment the world is more imminently in need of farmers than of warriors.

Anita Stewart and Earle Williams in "The Juggernaut." The Ogden tonight. 5c and 10c.

WORLD'S MARKETS

New York, July 15.—War shares gave promise of greater activity and higher prices at the opening of today's trading. Gains of 1 to almost 2 points were registered by Bethlehem Steel, Crucible Steel, Westinghouse, General Motors and Baldwin Locomotive, with a new high record for the latter. In the more representative issues yesterday's irregularity was renewed. Southern Pacific displayed marked heaviness. Canadian Pacific also reflected further pressure, despite its substantial gain in the London market where other international stocks were variably lower.

Reactions from early prices were general before the end of the half hour.

Chicago Hog Market.—Chicago, July 15.—Hogs—Receipts 14,000; strong, 5c above yesterday's average; bulk, \$6.90@7.40; light, \$7.30@7.85; mixed, \$6.85@7.75; heavy,

"WATCH US GROW." MIGHT WELL BE WAR MOTTO FOR UNION OF SOUTH AFRICA

Latest acquisition is larger than Germany.

\$6.50@7.45; rough, \$6.50@6.80; pigs, \$6.75@7.70.

Omaha Livestock.

Omaha, Neb., July 15.—Hogs—Receipts 3800; higher; heavy, \$6.55@6.90; light, \$6.75@7.45; pigs, \$5.35@6.75; bulk of sales, \$6.70@7.25.

Cattle—Receipts 1800; steady; native steers, \$7.75@10.10; cows and heifers, \$6.00@8.75; western steers, \$6.50@8.50; Texas steers, \$6.00@7.75; cows and heifers, \$5.80@7.50; calves, \$7.00@10.00.

Sheep—Receipts 13,000; steady; yearlings, \$6.25@7.00; wethers, \$6.00@7.65; lambs, \$8.00@8.25.

New York, July 15.—Raw sugar steady; centrifugal 4.83@4.86; molasses 4.06@4.08.

Short covering caused a rapid upturn in the market for sugar futures early today and prices at noon showed 10 to 14 points net gain.

Chicago Grain

Chicago, July 15.—Notwithstanding that wheat at the start showed a tendency to decline, prices quickly recovered. The failure of Liverpool quotations to reflect in full the sharp advances here led at first to a good deal of selling. Sentiment, however, changed in favor of the bull side when the fact developed that export houses here were buying. In addition the prevalence of rainy weather counted against the bears. After opening 1.4 to 1.8c lower, the market underwent a further sag and then rose in some cases slightly above last night's level.

Corn swayed with wheat. Trade was rather light. The opening, which ranged from the same as last night to 3-8c down, was followed by an additional decline and later a complete rally.

In oats as well as in corn, the chief influence was the action of the wheat market. Most of the transactions in

oats were between pit speculators. Higher prices for hogs lifted provisions. The chief demand, though, came from shorts.

A decided advance in wheat ensued, owing somewhat to the black rust reports from new points north-west. July rose to the highest figures touched since the last week of May. The strength, however, failed to last it being said that the bulge had stopped export sales. Closing prices were unsettled at 3-4 to 13-8c net decline.

Pronounced weakness in corn developed subsequently. Hot weather was said to be forcing rapid crop growth. The close was nervous 3-4 to 11-4c under last night.

Chicago, July 15.—Wheat No. 2 red nominal; No. 3 red new \$1.20@1.22; No. 2 hard, nominal.

Corn No. 2 yellow, 79 1-4@79 1-2c; No. 4 yellow 78 3-4c.

Oats No. 3 white, 55@55 1-4c; standard 55 1-2@55 1-4c.

Rye nominal.

Barley 73@78c.

Timothy \$5.50@6.75.

Clover \$8.50@13.25.

Pork \$15.10.

Lard \$8.12@8.27.

Ribs \$9.50@10.10.

SALT SCARCE IN NEW FOUNDLAND

War Delays Steamers and Deprives Fishermen of Benefits of Unusually Large Catch.

St. John's, N. F., July 15.—A scarcity of salt threatens to offset to a large extent the benefits derived by the New Foundland fishermen from the unusually large catch of cod along the northern and eastern coasts and on the Grand Banks this summer. The war has caused delays to steamers bringing the salt.

Although at least 15,000 tons of salt is expected to reach here next month, it will arrive too late to save a large amount of cod rapidly piling up at fishing centers.

An actual train-wreck in "The Juggernaut" cost \$30,000. See it tonight, last time, The Ogden.

AUSTRIA ISSUES A RED BOOK

Berlin, July 15, by wireless to Sayville.—Among the items prepared by

WAR SENDS FAMOUS SINGER BACK HOME

Miss May Peterson.

Sent home by the war, Miss May Peterson is singing in New York, and wrapped in the flag, gave the "Star Spangled Banner" from a suffrage float.

Save Money Here

—it is not "idle talk" when we tell you that you can positively buy the purest, best meats and produce here and save money.

—we have been making good on this claim for several years; we would like the opportunity of proving our statements to you.

Specials for this week-end:

Choice, fresh link sausage, 2 lbs. for...25c	Pork Spareribs, 3 pounds for.....25c
Extra-fine pot roasts, the lb.....15c	Round steak, the lb.....17 1/2c
Peanut butter, the lb.....15c	Fresh salmon, the lb.....17 1/2c
Fresh halibut, the lb.....15c	Full cream cheese, the lb.....20c
Bulk lard, the lb.....15c	Our choice, fine creamery butter, lb.....30c
A new shipment of Pretzels, lb.....15c	Cup Quality, the best coffee, lb.....35c

Interior of Sayville wireless station and Capt. William H. G. Ballard.

Following reports of the violation of the neutrality of the United States by the sending of military messages to Germany, the navy department has taken over the station and put Capt. William H. G. Ballard in charge.

Captain Ballard, head of the navy radio service, has been in charge of the most far-reaching wireless station in the world, that of the navy located at Arlington, Va.

the Overseas News agency today for transmission abroad by wireless telegraphy was the following: "The Austro-Hungarian government has published a red book dealing with the preparedness of Italy for war. It showed that the Italian government received incorrect information from its diplomats, who underestimated the preparedness of Austria. The documents have to do with the years 1909 until 1911 and prove that the alleged violation of the triple alliance was approved by Italy."

Two reasons are set forth to explain the sudden activity of a crater believed long extinct. Down at the bottom of the crater molten lava must have existed unknown for ages. Whether a cloudburst or whether melting snow precipitated water in sufficient quantities down the crater to cause the accumulation of steam that brought about the eruptions, the government scientists, among other things, will endeavor to determine.

After having erupted something like forty times in the past fourteen months, Mt. Lassen, California, is to become the subject of government study. An expedition from Washington is expected to reach the California mountain sometime in July and begin systematic observations to increase the world's lore on volcanoes.

Mt. Lassen is particularly interesting as it is the only active volcano in

the United States and because it is easily accessible to travelers. Practically unknown until it suddenly became active a year ago in May, it jumped to the foreground of volcanic phenomena through the number and violence of its eruptions.

Your last chance tonight to see the photoplay sensation of the year, "The Juggernaut." The Ogden. 5c and 10c.

The recent federal bird census has revealed there are 120 English sparrows to every square mile. Only the robins are more numerous.
